On The Green

Happening this month we will begin to do some much needed aerification on the Tee Tops and Greens. Tee tops will be done periodically throughout this month and the greens will be done on Monday, April 26th, and Tuesday, April 27th. We will be using the small 1/4 inch solid tines on the greens. The larger hollow tines will be used in the summer.

We are trying to manage our golf cart traffic control with new signs on the course. We prefer not to have signs all over, but players continually drive around tees and greens; and do not stay on the cart path. Please do your part and try your best to be on the cart paths when you can.

We are sure you have noticed the spots on the greens for the last couple of years. That is us trying to take out the weed "goose grass" that has contaminated our greens. We are getting better at it but we have to continue with this program until it is gone.
